## ADDITIONAL EXPERIENCE AND AWARDS

---

- **New Horizon College of ICT Certification Software Engineering** (2022 – 2023).

## PROJECTS

---

### **Homyz Real Estate Project (2023) — Real Estate Website** (<https://realestate-master.vercel.app/>)

- **Accommodation Search:** Users can search for accommodations by entering their desired location, travel dates, and other filters such as price range, room type, amenities, and more. The search results display available listings based on the specified criteria.
- **Listing Creation:** Property owners can create listings by providing detailed information about their accommodations, including photos, descriptions, amenities, pricing, and availability. They can also set house rules and specify any additional services or experiences they offer.
- **Booking and Reservation Management:** Users can view available listings, select their desired accommodation, and proceed to book it for their chosen dates. Users can also cancel the bookings if they are no longer interested in booking the desired property.
- **List of favourites:** users can add a certain property or list of properties to their favourite list to book for a later time.
- In this project the login/Authentication method is a sign in by pop-up method. Please be sure to check if your browser is not blocking the authentication pop-up so as to allow you receive valid jwt from the server which will let you enjoy numerous features that this website has to offer.

### **Food Order App Project (2023) — E-commerce Website**

- Implemented a shopping cart and checkout system that allows users to purchase products online.
- Implemented search and filtering functionality to allow users to find products easily is being worked on.
